were badly damaged by fire and water on Wednesday night. D. W. Eymore, a passenger on the Dakota from Victoria to San Francisco, was lost.

Supposed to have jumped overboard. The announcement of the death of B. F. Sherwood, a San Francisco broker, was premature. There are hopes of his recovery. On the 23d ult. Panema was in a state of quiet and peace. Commissioners have been sent to treat with the fractious State militia under Col. Von Lade, and will no doubt succeed in inducing them to lay down their arms. The Perhincha battalion will then return to Bogota. The U.S. ships Richmond and Omaha left there for Callao on the 28th

New York has gone Democratic. The other States voted as reported in yesterday morning's HERALD.

News was received in New York yesterday that about forty prominent Cubans have been recretly arrested in Havana and thrust into prison upon suspicion of being connected with the revolutionary movement.

The Havana authorities at Kingston, Jamaica, have proposed to restore the cargo of the steamer Uruguay, under a bond of \$5,000, stipulating that it shall go direct to a port of the United States. The conditions have not been accepted.

SAN FRANCISCO is going on a crusade against quacks. If she expels all her quacks the number of those engaged in almost every department of business will be greatly reduced.

THE Santa Monica Outlook does not take kindly to the fact that the HER-ALD inaugurated the Los Angeles and Independence Railroad enterprise. We regret to see the Oullook feeling so badly over what cannot be gainsaid. But the files of the HERALD and those of its cotemporaries tell the story.

ONE of the first things the next Legislature ought to do is to kill that libel on educational publications-The California Teacher-or leave it to stand on dollars taken from the State Treasury in the name of that publication are worse than thrown away.

THE Stockton Leader, LAURA DE FORCE GORDON'S paper, is to be removed to Sacramento and will be issued as an evening paper until the first of January, when it will be changed to a morning journal. It will remain under the same management and continue Democratic in principle.

THE New York Herald says that real estate has shrunk in value in that city during the last two years no less than 33 per cent. as the assessed valuation in 1871 was \$770,000,000 the loss foots up the enormous amount of \$256-000,000. The total shrinkage in real estate East of the Rocky mountains since the panic cannot fall short of one thousand million of dollars, and this is but a small part of the general depreciation in values.

BARON ROTHCHILD, one of the principal members of the rich family is coming to California. His visit to the Golden Coast will be full of interest, and may not be without substantial benefit to our State. The Baron may find that in the mines and railroads of the Pacific Coast there is a safer and better investment for the many millions of money which his house puts in the securities of the European governments. He will see in San Francisco, men who have fortunes nearly equal to his own, who but a few years ago were penniless; he will see others whoown mines in the Comstock Lode that will make them richer in twenty years than the whole ROTHCHILD family.

IT is amusing to witness the celerity with which BEN. BUTLER picks himself up after a hard fall. He was considered as laid away on a very elevat- be the means of rejuvenating the ed shelf and covered up with numerous relics of the war, in fact it seemed he was politically as completely bottled as he was before Richmond, and that the cork had been driven in and wired down. But he is out again in all the majesty of his strength, and delivering lectures on the currency. There was a time when BEN. was such an ardent admirer of silver that he took it even when moulded into spoons, but he now ranges himself on the "Rag baby" platform, and is endeavoring to convince the people of New York and Massachusetts that hard cash is a relic of barbarism.

The land was prepared by deep harrowing and plowing, and no irrigation was resorted to, even when the plants were set out. The first crop had been cut and cured by the CULP process, and the second crop had just been topped An experienced tobacco grower from Missouri accompanying our representative pronounced the Florida tobacco of good quality, and well adapted for manufacturing into plugs. The growth of the second crop was pronounced nearly an average product in the States though it is inferior to what it should be owing to late planting. What the yield of the first crop was in pounds Captain HUTCHINSON had not yet definitly ascertained on the scales. He is so well satisfied with his experiment this season, however, that he will put in a larger area next year, and he also is considering the policy of establishing in connection with his ranch a manufactory of plug tobacco. The enemy of this plant, the tobacco worm, was found in numbers on the ranch, and Captain HUTCHINSON says that they give quite as much trouble as in the States.

Origin of the Aboriginies.

The origin of the Aboriginies of America has vexed the scientists for the last two or three centuries. The most plausible theory is that they were descended from the Mongolians, and entered the country by way of Behring's straits. SAN FRANCISCO, Nov. 4th,-The redemption of the note of the gold bank coast company commenced at the Sub Treasury in this city to-day. Assistant Treasurer Sherman has received orders to redeem the notes of the suspended bank to the amount of \$360,-000. Notes amounting to \$400,000 were redeemed in the city under instructions received shortly after the first suspension, from the fact that the present order limits the redemption in San Francisco to \$360. It is inferr-Republicans 40 majority on joint bal- ed that provision for the redemption of the remaining \$40,000 has been made in the Sub Treasury in New York. The holders of the gold note of the Trust company do not appear to be in any great hurry to exchange their notes for gold coin. There was no run on the Sub Treasury to-day, in fact the premium was so light that the total amount of gold coin paid out up to noon did not exceed \$10.000. It is officially announced that the Bank ward a re-organization at an early date after the new year. It is confidently expected that the old business of the old institution will be there in such a positton that the change can be easily effected. The subscribers to the relief fund will form the new organization which will take the Bank with its available assets, good will and all respondence at their par value and make a new beginning. Whatever moneys are realized from such assets as are not taken into the reorganizatsons will go to the credit of the stockholders. In this way the affairs of the present organization will be adjusted as early aspossible and the stockholders will receive a handsome dividend.

county has become a proverb: Three years ago, says the Rural Press of recent date, two young ladies of Oakland, having just completed their education went to Los Angeles and

formed a co-partnership in bee-farming. With their scanty savings in school teaching, they got possession of some bee pastures, kept on teaching and extending their business, and secured 200 stands of bees. Last week one of the partners brought to this market 2,500 pounds of white sage honey, and has another 1,000 pounds coming. The names of these worthy examples of tact and industry are Miss Emily Smith and Miss Josie Lindley.

WONDERFUL

ARITHMETICAL CALCULATION

A Sewing Machine Factory Turus out One Hundred Machines per day More than it is Capacitated to Make!!!

THE SINCER M'F'C CO'S Sewing Machine Agent has no doubt that the Remington agent justly anticipates harder names for his "pet" machine when it is understood that it is neither "The Singer Improved" nor an "improvement on the Singer." By referring to one of our dailies I find that this soft, noiseless, "pet" machine has been introduced into Los Angeles at a much earlier date than the agent states. (This may be owing to a defect of memory).

The Remington agent has made a rather startling statement to the public in his latest advertisement to this effect—that the Remington S. M. Co. in the manufacture of their family machines have thereased from 49,000 to 85,000 in the past four months, and in the same paragraph says that the factory is only capacitated to make 250 per day; thus allowing every working day during said period I find that he gives the "Remington folks" eredit for 100 machines more per day than the Factory, with all its "large facilities," can produce—a pretty hard strain on the most iertile imagination.

The Remington Agent asks the "Singer folks" a very important question, namely: Do they base the merits of their machines upon the sales of former years? As I am the only representative of the Singer Mig. Co. in this county I shall answer the question. The Singer Mig. Co., points with just pride not only to their sales in the past but also to the fact that those sales have constantly increased up to the present. I hold to the rule that the comparative sales of a machine constitutes a correct criterion of its merits and a true index of its popularity.

I shall have no difficulty in tracing beek the history of the Singer Sewing Machine, for THE SINGER M'F'C CO'S Sewing Machine Agent has no doubt that the

THE STAR FRUIT DRYER.

This Dryer commends itself to every person who examines it. Every family who has an orchard, vineyard or garden ought to have one. It will supersede the canned fruit, as fruit and vegetables dried on this machine retain their freshness, and if soaked in water thirty minutes before cooking they are as sweet and fresh as those direct from the garden. Now while there is no sale for grapes, one of these machines will be worth a thousand dollars on a vineyard in making Raisins. With one of these machines you are independent of the local market.
